

Daniel Marinelarena

Full Stack Software Developer

Fontana, CA | (909) 441-6200 | webdevdano@gmail.com | danielmarinelarena.vercel.app | github.com/webdevdano | LinkedIn

PROFESSIONAL SUMMARY

Full Stack Software Developer with 2+ years of hands-on experience designing, developing, and maintaining complex web applications across the complete software development lifecycle. Proficient in JavaScript, React, Node.js, TypeScript, PostgreSQL, MongoDB, Docker, and CI/CD pipelines — with a strong foundation in Agile methodologies, secure coding practices, and performance optimization. Proven track record of delivering scalable, high-quality solutions for real-world clients, participating in architectural design decisions, and writing clean, maintainable code that adheres to engineering best practices. Portfolio of 7+ live, commissioned applications spanning e-commerce, booking platforms, data tracking, and farm geolocation — demonstrating consistent ability to translate business requirements into reliable production software. U.S. Citizen eligible for security clearance.

TECHNICAL SKILLS

Languages: JavaScript (ES6+) | TypeScript | Python | HTML5 | CSS3

Frontend: React | Next.js | Redux | Tailwind CSS | TanStack Query | Zustand | Angular (familiar)

Backend: Node.js | Express.js | RESTful APIs | GraphQL (Apollo Server) | JWT Authentication | Prisma (ORM)

Databases: PostgreSQL | MySQL | MongoDB | Database Schema Design | Relational & NoSQL

DevOps & CI/CD: Docker | Git | GitHub | GitHub Actions (CI/CD) | Vercel | Render | Netlify | Stripe

Testing & Quality: Jest (unit & integration) | Cypress (end-to-end) | React Testing Library | Postman

Methodologies: Agile | Sprint Planning | Code Reviews | Secure Coding | Performance Optimization | Technical Documentation | WCAG Accessibility

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer | Self-Employed | Nov 2023 – Present

- **Designed, developed, and maintained 7+ complex production applications** end-to-end — translating business and technical requirements into scalable, high-quality software solutions deployed for real-world clients
- Participated in **architectural design decisions** across multiple projects — selecting appropriate database models, API patterns (REST vs. GraphQL), authentication strategies, and containerization approaches based on project constraints and scalability needs
- Built Hidden Gifts, a **commissioned e-commerce platform** using React, Node.js, Express, MongoDB, and Stripe — delivering live transactions, order management, and an admin CRUD dashboard that reduced client manual processing time by ~80%
- Engineered FreshCutz, a barbershop booking platform with **Stripe payments, real-time availability, JWT authentication, and double-booking prevention** — applying secure coding practices and role-based access control throughout the stack
- **Implemented CI/CD pipelines** via GitHub Actions and containerized NutriTracker using Docker with self-hosted PostgreSQL — refactored REST APIs to GraphQL reducing over-fetching by 40%+, added Redux state management, and achieved 90%+ test coverage with Jest/Cypress
- Developed UnitedFarms, a full-stack farm locator with **geolocation filtering, secure RESTful API endpoints, and role-based user authentication** — built on Next.js, TypeScript, and MERN stack with a focus on performance and reliability
- **Conducted iterative code reviews** on personal and collaborative projects — enforcing DRY/KISS principles, consistent coding standards, and security best practices to maintain high-quality, maintainable codebases
- Prepared and maintained **technical documentation** including API references, database schemas, and architecture diagrams across all major projects

Operations Associate | Event Aces | Sep 2021 – Present

- Collaborated cross-functionally with team members to manage workflows serving **300+ customers per shift** — demonstrating reliability, effective communication, and the ability to execute under pressure while meeting strict operational deadlines

KEY PROJECTS

Hidden Gifts — Commissioned Full Stack E-Commerce Platform

- React, Node.js, Express, MongoDB, Stripe, Tailwind CSS | Product browsing, cart, JWT auth, Stripe checkout, admin CRUD panel | Live commissioned project — full requirements-to-deployment lifecycle

NutriTracker — *Full Stack Nutrition & Macro Tracking App*

- React, TypeScript, Node.js, Express, Docker, PostgreSQL, GraphQL (Apollo Server), Redux, Tailwind CSS | CI/CD via GitHub Actions, Jest/Cypress testing suite, containerized self-hosted DB, REST-to-GraphQL migration

FreshCutz — *Barbershop Booking & Payment Platform*

- React, TypeScript, Node.js, Express, MongoDB, Stripe, Tailwind CSS | Real-time availability, Stripe payments, JWT auth, double-booking prevention — security-first architecture with RESTful API design

UnitedFarms — *Full Stack Farm Locator Application*

- Next.js, React, TypeScript, Tailwind CSS, MERN Backend | Geolocation filtering, role-based auth, product search, secure API endpoints — focused on scalability and reliable location data handling

TasksOnTasks — *Task Management Application*

- React, TypeScript, Node.js, Express, MongoDB | Drag-and-drop task management, user auth, CRUD, persistent storage — clean UX with robust state management architecture

Surfs Up — *E-Commerce Storefront*

- React, TypeScript, MERN stack, Stripe, Tailwind CSS | Product filtering, cart persistence, order management, Stripe payments, mobile-first responsive design

EDUCATION & CERTIFICATIONS

Full Stack Web Development Certificate | Springboard | Jan 2025 – Jul 2025

- 700-hour mentor-led curriculum covering front-end and back-end development, algorithms, data structures, databases, and software engineering best practices — industry-recognized program equivalent to a CS degree in contact hours

Full Stack Development Bootcamp | 100Devs | Aug 2023 – Jul 2024

- 55-class project-based curriculum covering HTML, CSS, JavaScript, Node.js, Express, MongoDB, and full-stack application development under Leon Noel — highly selective program with strong emphasis on professional engineering standards and collaborative development

755+ combined hours of structured full-stack training | 7 live production applications | U.S. Citizen eligible for security clearance
